ABSTRACT

A 3-volume computer-generated bibliography based on archive tapes received from OCLC, Inc. by the New York State Library, this catalog cumulates entries for monographic documents published by New York State that were cataloged over a 5-year period. The full bibliographic description provided for each monograph listed includes subject and added entries, New York State Library classification, Library of Congress card number (when available). and OCLC identification number. The complete description appears only under the main entry, with cross references provided by added entries, i.e., author, title, series, and subject. The cumulation schedule for this catalog is now established as quarterly, annually, and quinquennially. (SW)

FOREWORD

The publication of the 1973-76 *Dictionary Catalog of Official Publications of the State of New York* marked the first attempt to provide a computer-generated bibliography of New York State documents using catalog data contributed by the New York State Library to a national data base. This dictionary catalog is generated from archive tapes received from OCLC, Inc., using the authority file and page format programs of The New York Public Library to produce copy for publication.

This issue of the *Dictionary Catalog* cumulates cataloging entries for New York State *monographic* documents cataloged between December 18, 1973 and December 29, 1978. The cumulation schedule is now established as quarterly, annually and quinquennially. The *Checklist of Official Publications of the State of New York*, useful as a current bibliography and acquisitions tool, **will continue to be published monthly.**

SCOPE OF THE DICTIONARY CATALOG

The *Dictionary Catalog* contains all monographic titles cataloged at the State Library during the stated period. The *Dictionary Catalog* is not a true cumulation of the *Checklist*, omitting serials and ephemera. A list of current New York State serial titles may be found in February issues of the *Checklist*. Older titles being cataloged for the first time appear on this list, even though they have not appeared on the *Checklist*.

The *Dictionary Catalog* provides full bibliographic description for each monograph included, including subject and added entries, New York State Library classification, Library of Congress card number (when available), and OCLC identification number. Full bibliographic information appears only under the main entry. All cataloging follows *the Anglo American Cataloging Rules* (First ed.), and subject headings conform to *Library of Congress Subject Headings* (eighth edition)

MICROFORM EDITION OF NEW YORK STATE DOCUMENTS

The State Library cooperates with Research Publications in the production of a microform edition of all New York State documents listed on the *Checklist*. Documents are filmed monthly as they appear on the *Checklist*. The films are available from Research Publications, Inc., 12 Lunar Drive, Woodbridge, Connecticut 06525.

Access to the titles on the film is from the *Checklist* citation. From September 1974 through February 1977, the titles were arranged on the films according to the sequential *Checklist* numbering; beginning in March 1977, the Library began using a newly devised New York State document classification scheme consisting of an alpha/numeric code for the issuing agency, an alphabetic code for the title, and a time accession number. The titles were then arranged on the film by the time accession number.

Titles listed in the Dictionary Catalog may be located on the film by the time accession number. For those titles which do not have a time accession number (cataloged prior to March 1977), a cross-index has been provided from the OCLC identification number to the Checklist entry number.

Please note: The Checklist carries titles such as ephemera and serials which will appear on the films, but which do not appear in the Dictionary Catalog. Conversely, there are titles in the Dictionary Catalog, which appear because they are New York State-related or because they have been recataloged, which were not checklisted and which will not be on the films. Any OCLC number which does not appear in the cross-index is not available on the microfilm. The films also exclude copyrighted material, but a notation to that effect appears on the film in the proper location.

The microform edition provides other libraries with the opportunity to have the same comprehensive coverage of official publications as the New York State Library.

USING THE DICTIONARY CATALOG

Citations are listed in traditional dictionary catalog order; that is, the listing contains authors, titles, series, subject and secondary entries interfiled in one alphabet. Subject entries appear in upper case letters.

Entries in this catalog are arranged according to certain basic filing rules:

1.) Filing order is word for word; e.g., New York files ahead of Newark.

2.) Initial articles of title, and all punctuation, are ignored in the filing order.

(There are descrepancies with some titles. Some are filed under initial articles because they are added titles in a language different than the original work. Example: A television course in beginning college Spanish.)

3.) Names beginning with "M" or "Mc" are arranged as if written "Mac."

Full bibliographic information appears only under the main entry. Added entries do include call number and OCLC number.
